

THE FISCAL AND OPERATIONAL PLATFORM FOR NETSUITE

*It's not an add-on. It's not a module. It's
the **platform** adopted by companies
that don't want to take **risks**.*

The MX+ promise

Your tax and accounting operations run smoothly, without manual processes or reliance on external systems. MX+ transforms NetSuite into a platform fully compliant with SAT standards.

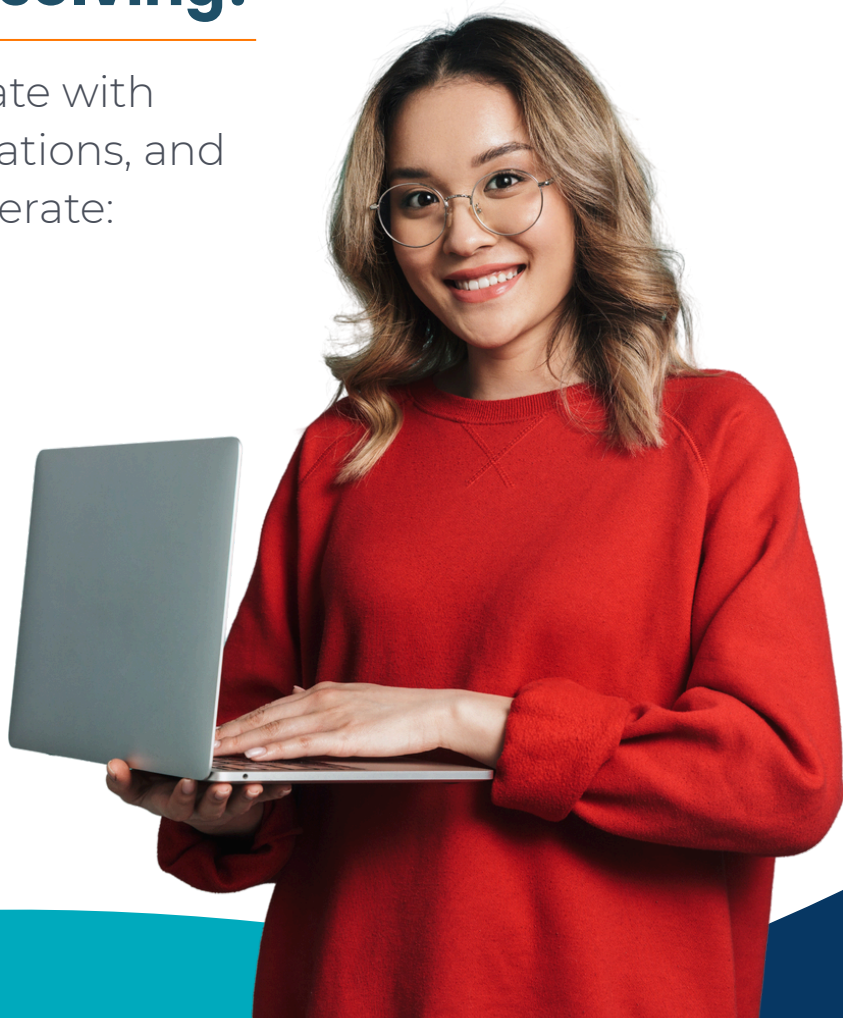

Permanent compliance. Zero risks. Zero chaos.

What problem are we solving?

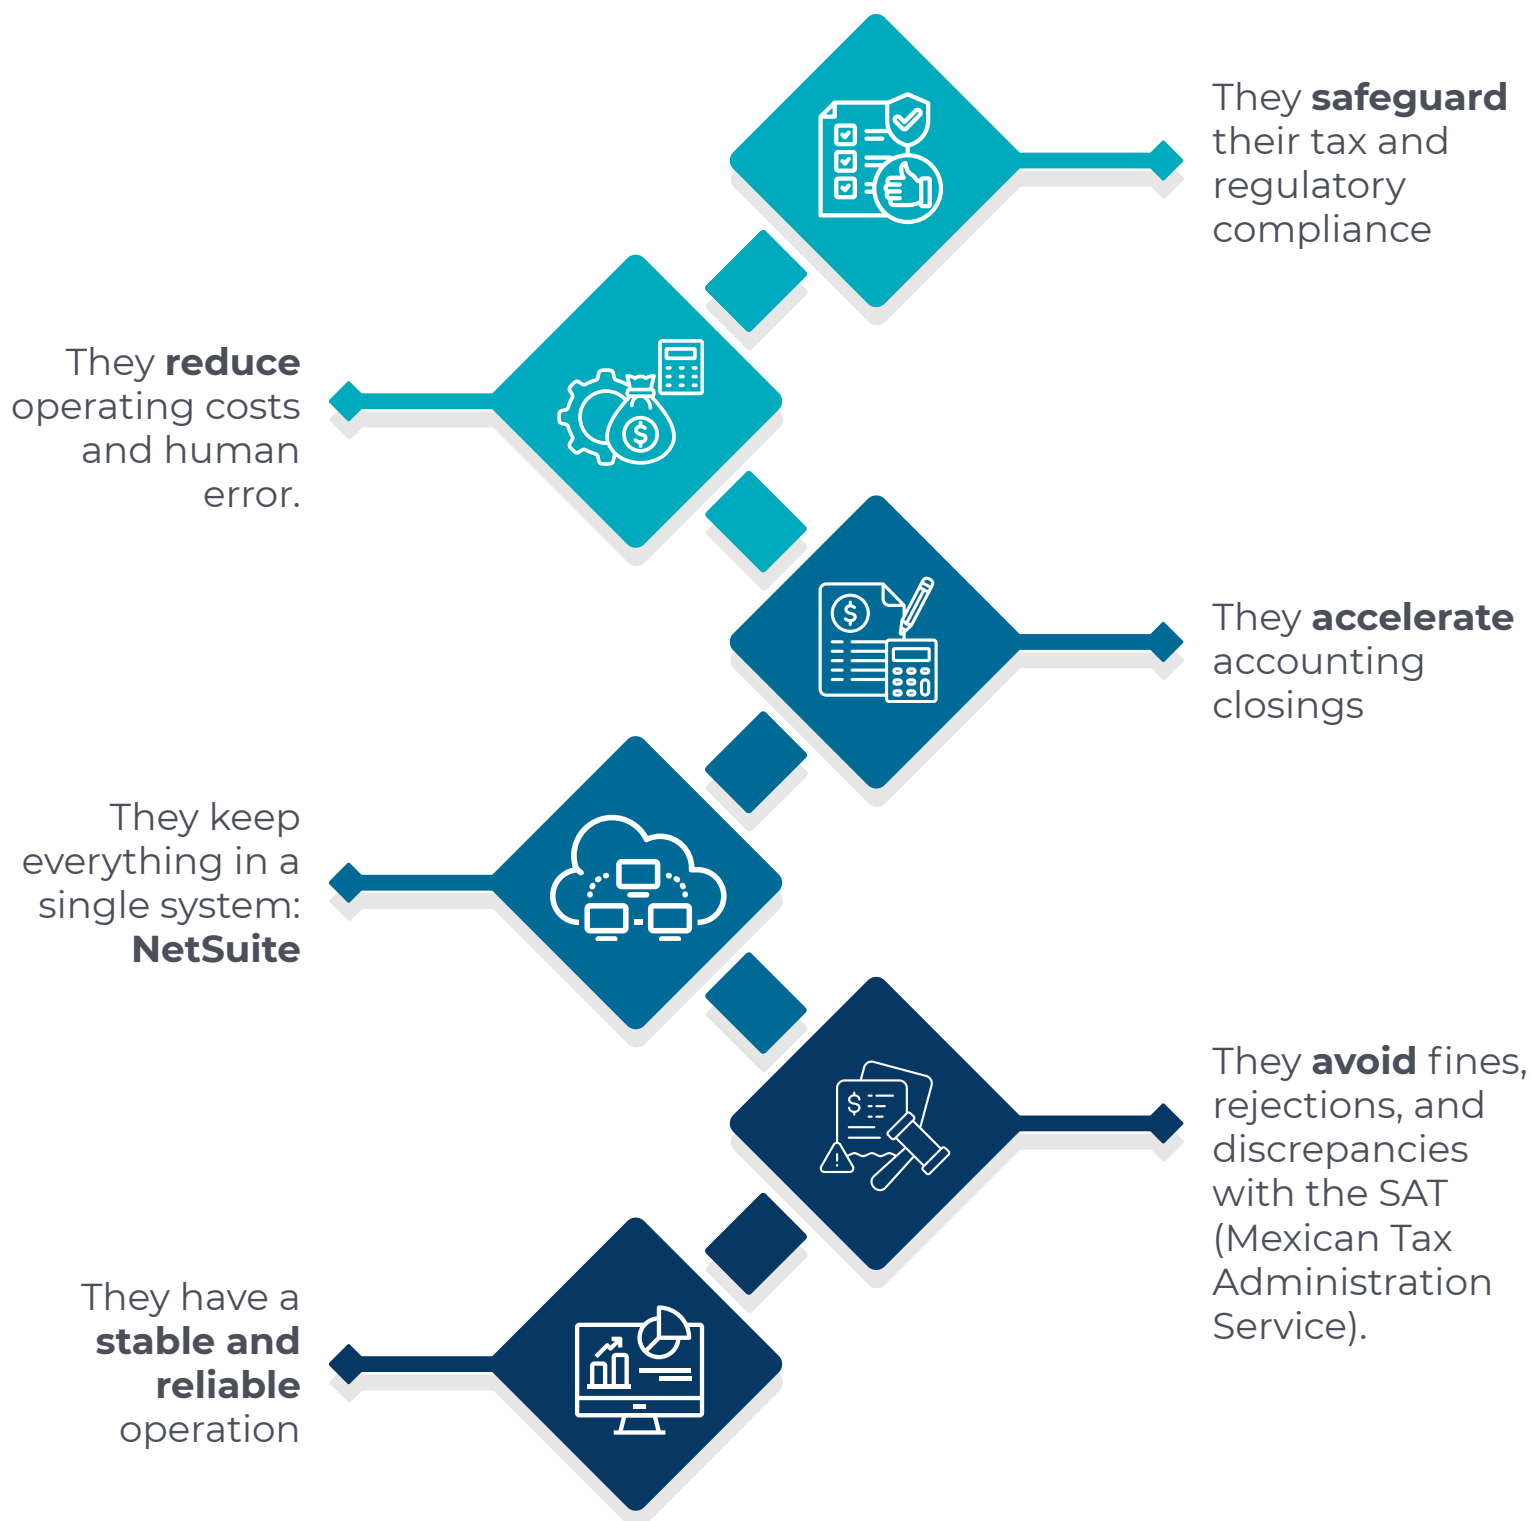

Most companies in Mexico operate with manual processes, external validations, and disconnected solutions that generate:

- Errors in stamping and accounting
- Constant risk in audits
- Rework for finance
- Dependence on key people
- Inconsistent tax information

MX+ eliminates all that

Why are companies adopting MX+?

MX+ is not an additional tool. It is the critical infrastructure that supports **fiscal operations**.

Frictionless billing and stamping

Issuance and stamping of CFDI in one click:

- **Compatibility** with sales invoices, credit notes, payment and transfer
- **Mass and automatic** generation of CFDI
- **Cancellation** within NetSuite
- **Additional services:** Bill of lading, Foreign trade, Donation, Educational, Factoring, Retail and more
- **Automatic tax reclassification Impact:** Fewer points of failure, less rework, faster closures

Global and consolidated billing

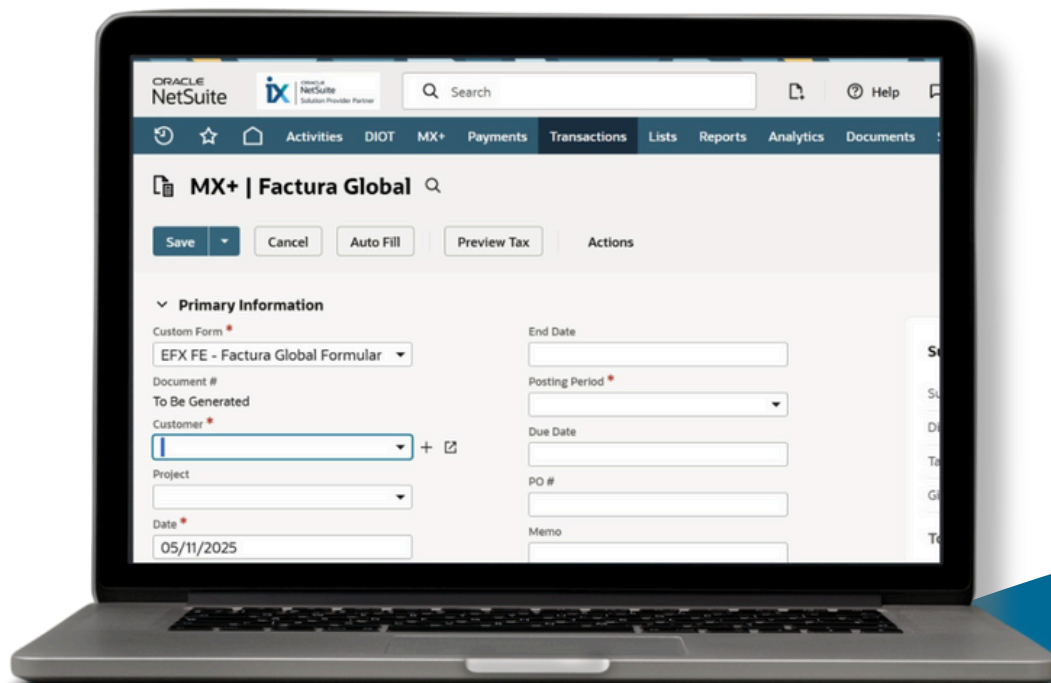

Ideal for retail, marketplace, distribution and high-volume operations.

MX+ allows you to consolidate invoices under:

- Unique concept
- Per transaction
- Detailed articles
- Grouped articles

Includes: automatic credit notes on global invoices.

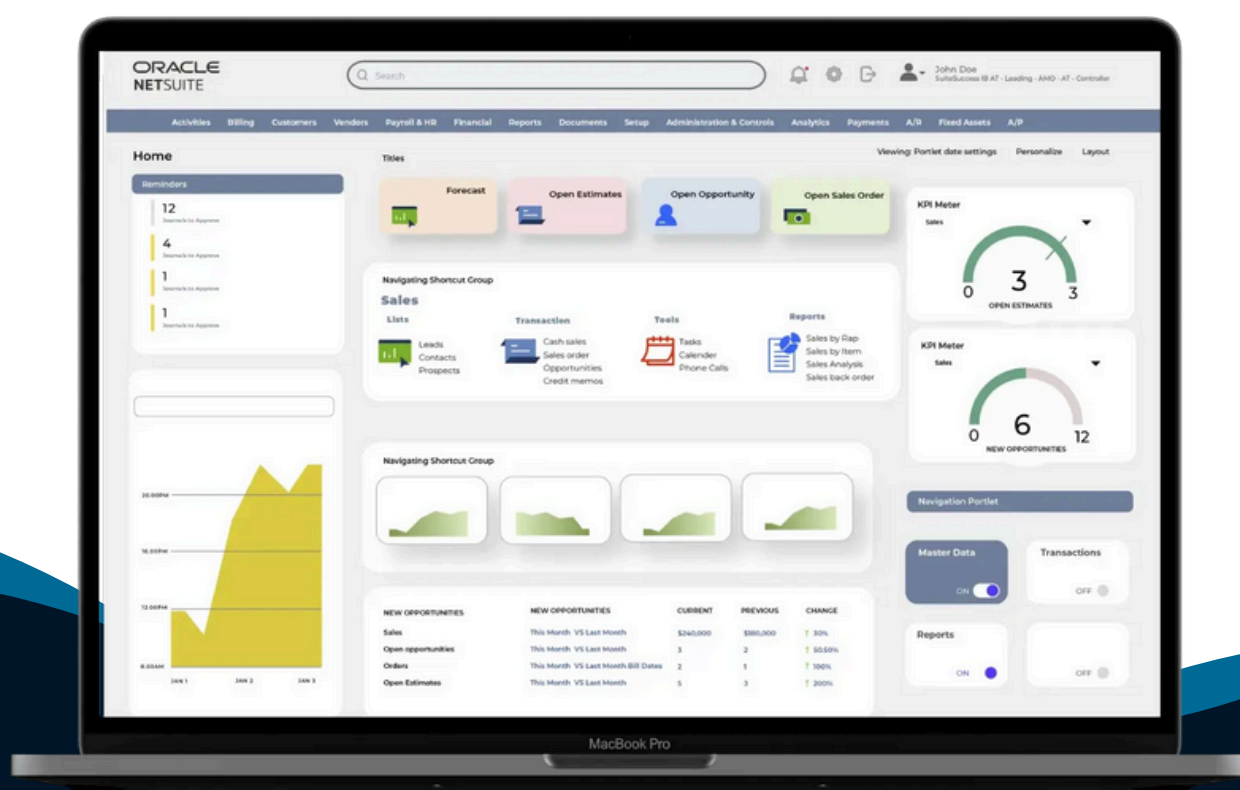

Impact: massive operation without errors or bottlenecks.

Certified addenda

MX+ includes a catalog of ready-to-use addenda. If you need a new one, we'll develop it for you.

Impact: You meet your customers' needs faster without manual processes or external validations.

Global and consolidated billing

Enable your customers to obtain their CFDI without intervention from your team.

- Customization by subsidiary
- Adding and editing clients from the portal
- View and download XML and PDF
- Automatic credit notes for late billing

Impact: Free your billing and customer service team.

Receiving CFDI and expenses from XML

Process, validate, and register XML directly in NetSuite.

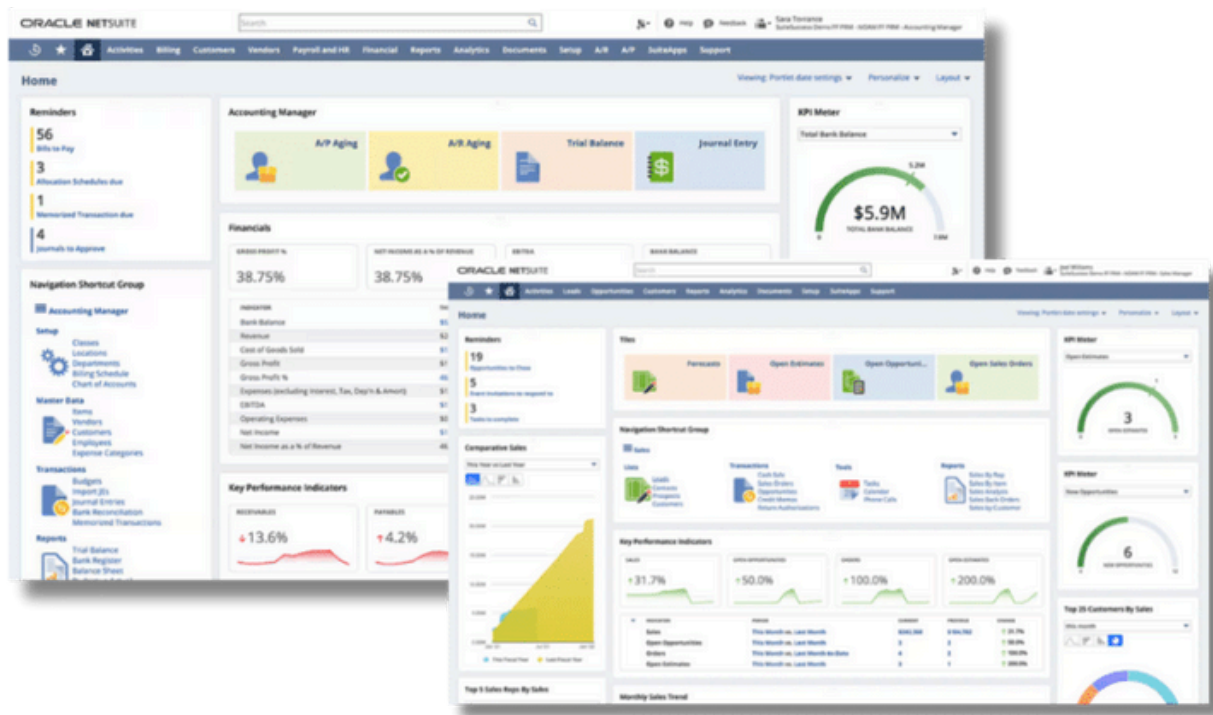

- **Creating** expense reports from XML. Individual validation.
- **Automatic** linking with purchase orders
- Real-time SAT **verification**

Impact: secure accounting, without discrepancies.

Fully automated DIOT

- Supplier **identification**, creditable VAT, transferred and withheld VAT
- **Classification** of domestic and foreign transactions
- **Reports** ready for monthly filings

Impact: compliance without relying on spreadsheets.

Automatic import/export orders and blacklists

MX+ controls customs declarations within your operation:

- Stamped with customs declaration number
- Imported inventory control
- Blacklist revisions (Art. 69-B)

Impact: legal and fiscal certainty

MX+ Support Service

Included for the SuiteApp **MX+** during the subscription period:

- Access to the support center for up to 2 users
- Case tracking: You will receive notifications from the time the case is received until its conclusion.

Why Efficientix?

+15 years transforming Mexican and multinational companies with deep NetSuite implementations.

We built MX+ based on hundreds of real projects. That's why it works.

Transform your operation.
Accelerate your fulfillment.
Maintain control.

MX+ Plans: Basic, Pro and Premium

At each level, tax coverage, automation, and operational capabilities increase. If NetSuite is your ERP, MX+ is the standard.
